

Recommendation Letter

To whom it may concern,

This letter serves as a recommendation letter for Duarte Cruz who was a Tech Summer Intern at Nmbros, from 01/07/2025 until 05/08/2025.

Duarte's main project involved developing AI rules using Cursor AI to automate our service project setup. He created smart boilerplate generation that reduced our typical 5-day setup process to about 1 hour – a huge time-saver for our development team.

What made this particularly impressive was that Duarte wasn't familiar with our internal guidelines and wasn't an advanced .NET developer when he started. Despite these challenges, he delivered excellent results in just 5 weeks. He picked up .NET Core quickly and showed good practical understanding of ML concepts. His .cursor rules effectively captured our development guidelines, allowing automated generation of new projects that follow our standards.

What stood out about John was his ability to learn quickly and apply new concepts practically. While his ML knowledge was sometimes more intuitive than formal, he consistently found ways to solve real problems with AI tools. He's comfortable with modern development practices and has a good sense of how to integrate AI into existing workflows.

His work was consistently reliable and delivered on time.

Recommendation

Based on Duarte's work with us, I think he has the technical foundation and learning ability to do well in a Machine Learning Master's program. His hands-on experience with AI tools, solid programming background, and genuine interest in the field make him a good candidate for advanced ML studies.

I'm happy to recommend Duarte for your program. Feel free to reach out if you need any additional information.

Best regards,

Rui Elói

Developer, Nmbrs
